**DETAILED ACTION**

***Election/Restrictions***

1. Applicant's election without traverse of claims 1-20 (Group I) in the reply filed on 5 November 2008 is acknowledged.
2. Claims 21-39 are hereby withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1-20 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification fails to clearly articulate what structure or elements constitute the "actuator mounted to the handle and connected to the diverter."

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 3723

7. The claims fail to provide any structure or limiting features that define what constitutes the “actuator”.

### ***Conclusion***

8. A claim, or claims, which fails to comply with the first and/or second paragraph of 35 USC 112, will not be analyzed as to whether it is patentable over the prior art since to do so would of necessity require speculation with regard to the metes and bounds of the claimed subject matter.

9. However, the examiner notes that according to the International Search Report filed 21 February 2006, the WIPO officer considered claims 1-20 to be obvious, at least in part, in view of Blase et al. (5,483,726) and VAX LTD (GB 2322065 A).

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Louis et al. (5,983,442) discloses a floor cleaner having, inter alia, an automatic conversion mechanism (“actuator”?) for automatic switching between modes of operation depending upon the position of the floor cleaner handle.
